

COMPOSITE SELF-DRILLING SOIL NAILS

The unique formulation and make up of our all new Composite Self-drilling Soil Nail allows them to be installed with percussion through sands, gravels, clays and compacted soils.

The modified Vinylester and special glass used in the manufacturing process give the nails excellent corrosion resistance properties.

The lightweight nails have an engineered thread and are complimented by a wide range of accessories including 316 Stainless steel couplers and end fittings (UTS 200kN) and a wide range of standard and purpose designed drill bits, end plates and adaptors.

Drill Bits and Adaptors

Tungsten Carbide Cross Head

Thread	Bit Diameter mm	Part Number
R32	51	63R32BIT/51EXX
	76	63R32BIT/76EXX

Tungsten Carbide Conical Bit

Thread	Bit Diameter mm	Part Number
R32	75	63R32BIT/75CP
R38	100	63R38BIT/100CP

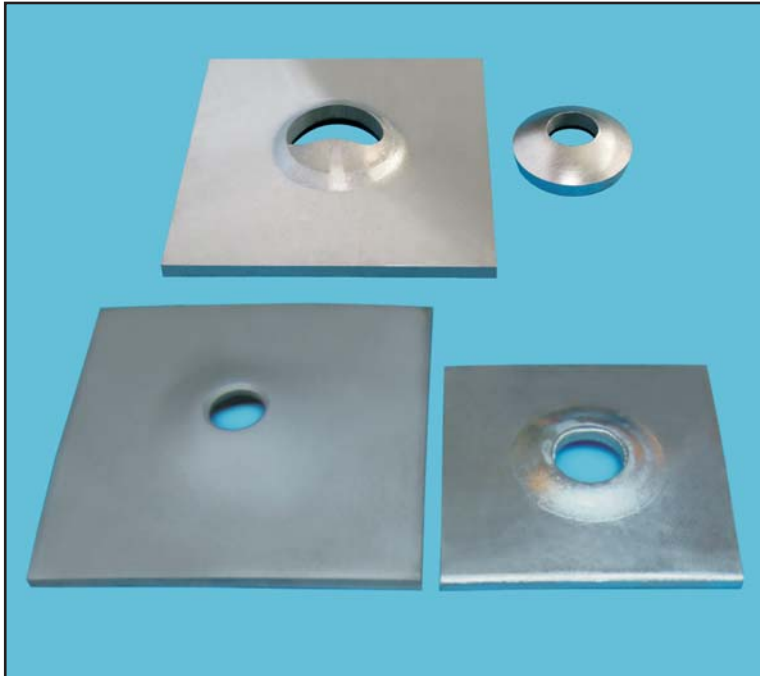

Drill Bit Adaptors

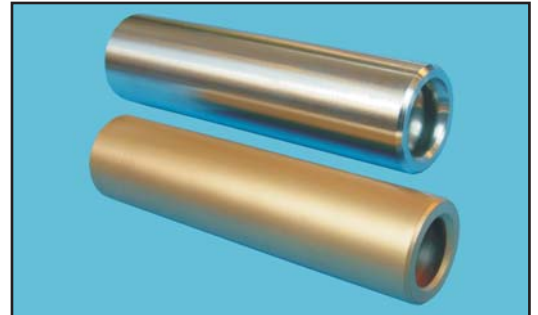

Increases choice of Drill Bit Diameter

Thread	Part Number
R32-R38	63R32ADAPT/R38

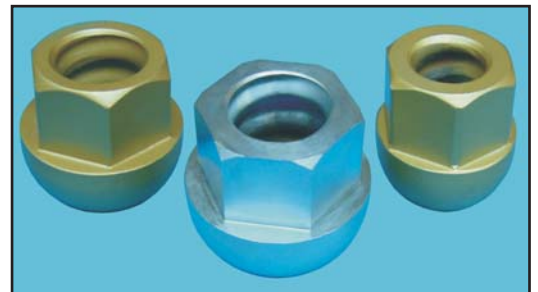

End Plates, Couplers and Nuts

Steel and Galvanised Steel End Plates

316 Stainless Steel and Galvanised Steel Coupling Sleeves

316 Stainless Steel and Galvanised Steel Domed Nuts
